

Pathways to Cures: Translational Science Research Day

Tuesday, June 13, 2017
The Cove at UCI Applied Innovation

Announcing Our

2017 Clinical Translational Scientist Career Achievement Award Recipient

The Institute for Clinical and Translational Science is pleased to announce the 2017 Clinical Translational Scientist Career Achievement Award Recipient. This award honors the career accomplishments of an investigator who embodies excellence in the broad spectrum of translational science from basic and applied research to implementing biomedical discovery to clinical practice. The common theme of this award is consistent and outstanding achievement in translational innovation that benefits human health.

Susan Bryant, PhD

Throughout her career at UC Irvine, Dr. Susan Bryant wore several hats including Research Professor in the Department of Developmental and Cell Biology and Developmental Biology, Vice Chancellor for Research, founding Editor-in-Chief of REGENERATIONHer, and Dean of Biological Sciences. She joined the faculty of UC Irvine in 1969 with a PhD from the University of London, and postdoctoral training at Case Western Reserve University. With her longtime service as a teacher, researcher, administrator, and leader, Dr. Bryant has been a driving force on a wide range of initiatives, from stem cell research to advancing gender diversity in the sciences. In her four years as Vice Chancellor, she guided the campus through significant increases in government and private support for research and scholarship, streamlined and reorganized the Office of Research to better meet the campus's changing needs, strengthened campus research centers, and oversaw initiatives designed to facilitate technology transfer.

Bryant is a leading expert in the study of limb regeneration. Her research, which has resulted in more than 100 publications, has focused on the fundamental rules of regeneration and may one day lead to new approaches and therapies for replacing and repairing lost, damaged or diseased parts of the human body.

Join us in celebrating Dr. Susan Bryant!
