

What is My Risk of Lung Cancer?

Lung Cancer Screening
and Education Event

The Thoracic Oncology Program at the Center for Cancer Prevention and Treatment is hosting a lung cancer screening event to raise awareness, provide education and offer same-day, low-dose CT lung screenings for eligible participants.

Detecting lung cancer at an early stage provides the best chance for a full recovery. The low-dose CT offers advanced imaging technology that can detect cancer spots on the lung which are often undetectable on traditional X-rays.

There are high-risk eligibility requirements that must be met in order to have a low-dose CT lung screening. If you are a current or former heavy smoker and over 50 years of age, please stop by to see if you meet the criteria.

Date

Thursday, October 18, 2018

Time

10 a.m. to 2 p.m.

Location

The Center for Cancer
Prevention and Treatment
St. Joseph Hospital
1000 W. La Veta Ave.
Orange, CA 92868
